ABOUT

Web developer with a background in teaching Physics and Engineering. Creative thinking and problem-solving skills and team management through science and engineering competitions. Meeting deadlines and working in a structured environment tirelessly. Project experience in server side and client side JavaScript frameworks.

EXPERIENCE

WED DEVELOPMENT

CareerFoundry | November 2020 - May 2021

- Intense training with several projects. Created web applications using front-end and back-end frameworks and libraries. Followed UX and UI design patterns and used Bootstrap in projects. Familiarity with agile development methodologies and ticketing systems and using Jira and Trello.
- Built a Full-stack web app called myFlix using MEAN and MERN stack that, follows MVC architecture, allow users to create an account, update their profile, and view their favorite movies.
- Used web accessibility, WCAG, and design principles in various projects.
- Brought solutions to the bugs and improve the quality of the codes throughout projects. Checked the applications for cross browser compatibility.
- Gained experience in client-side development while building single page web applications. Familiarity with reusable code.
- Practiced with Chrome developer tools, including how to diagnose and fix bugs. Applied SEO on several projects. Gained experience using Jest, Enzyme and Puppeteer testing frameworks.
- Check out my portfolio for some of my work completed during the bootcamp: <https://abakayfl.github.io/portfolio/index.html>

PHYSICS

Orlando Science Schools | May 2013 - May 2021

- Worked as a Physics and Engineering Teacher. Taught advanced and complex topics effectively.
- Prepared students to Science Olympiad and FIRST Robotic competitions thorough Saturdays and after school studies - coached and mentored a state winning teams.
- To help students to realize their true potential, organized extracurricular activities, communicated with parents and assessed students improvements throughout the year and took actions accordingly. And as a result, students were able to demonstrate their skills successfully.

EDUCATION

BACHELOR OF SCIENCE IN PHYSICS

Ege University | August 2011

CERTIFICATES

- Completed 7-month long bootcamp in Full-stack web development at CareerFoundry.
- Completed 42-hour long course in Java from Udemy.
