ABOUT

Full-stack web developer with a background in teaching Physics and Engineering. Creative thinking and problem solving skills and team management through science and engineering competitions. Meeting deadlines and working in a structured environment tirelessly. Project experience in server side and client side JavaScript frameworks.

EXPERIENCE

FULL-STACK WEB DEVELOPMENT BOOTCAMP

CareerFoundry | November 2020 - May 2021

- Intense training with several projects. Created web applications using front-end and back-end frameworks and libraries.
- Built a Full-stack web app called myFlix using MERN stack that allow users to create an account, update their profile, and view their favorite movies.
- Used web accessibility and design principles in various projects.
- Coordinated with my mentor and tutor to bring solutions to the bugs and improve the quality of the codes throughout assignments.
- Gained experience in client-side development while building single page web applications.
- Practiced with Chrome developer tools, including how to diagnose and fix bugs.
- Check out my portfolio for some of my work completed during the bootcamp: <https://abakayfl.github.io/portfolio/index.html>

SCIENCE AND ENGINEERING TEACHER

Orlando Science Schools | May 2013 - Current

- Worked as a Physics and Engineering Teacher.
- To help students to realize their true potential, organized extracurricular activities and prepared students to science and engineering competitions. And as a result, students were able to demonstrate their skills successfully outside the classroom.

EDUCATION

BACHELOR OF SCIENCE IN PHYSICS

Ege University | August 2011

CERTIFICATES

- Completed 7-month long bootcamp in Full-stack web development at CareerFoundry.
- Completed 42-hour long course in Java from Udemy.
